Remotely Monitor Tanks & Meters Increase Revenue. Improve Efficiency.

Meet the Pit Radio, the first monitoring solution specifically designed for underground tanks.

"I've been looking for a product like this for 5 years. I went with OWL[®] because they are the first underground Pit Radio made for the propane industry. With this product they have opened up a whole new market for underground tanks which has been a problem area for remote tank monitoring."

-Phil Marks III, Manager, Nantucket Energy

Custom OWL[®] Portal

- ✓ Create and manage customer information
- ✓ Manage radios and check provisioned status
- ✓ View and export tank level and fill data
- ✓ View a map of provisioned tanks and levels
- ✓ Tank level data is regularly transmitted to portal
- ✓ Upload fill data

Easy to Use Software

- ✓ Access your OWL[®] portal from anywhere
- ✓ Software integrated with GIS maps, graphics, reporting, and alerts
- ✓ Web based portal optimized for full mobile access
- ✓ API interface with back office systems

Wall Mount Tank/Meter Radio

- ✓ Tank Radio: monitors above ground tanks of all sizes
- ✓ Meter Radio: monitors meters, eliminates meter readers
- ✓ Sends fill level data to OWL[®] portal for instant web access
- ✓ Replaceable battery

Pit Radio

- ✓ Fits under the lid of the tank
- ✓ Flush mount, allows for added protection from hazards
- ✓ Sealed & Waterproof
- ✓ Sends fill level data to OWL[®] portal for instant web access

Details

- ✓ Replaceable battery* (wall mount radio only)
- ✓ 10-year full replacement warranty on all radio batteries
- ✓ 15+ year battery life
- ✓ 2-year hardware warranty on radio

*Pit Radio: non-replaceable battery

Strong ROI

- ✓ Increased revenue with Pay As You Go
- ✓ Increased customer satisfaction
- ✓ Increased operational efficiency
- ✓ Reduced truck rolls
- ✓ More gallons per delivery

Customer Testimonial

"I've deployed OWL[®] on propane tanks at both my commercial and residential accounts. Tank monitoring is great, but OWL[®] has taken tank monitoring to the next level with its GIS mapping and graphical capabilities. When I log into the portal I can immediately see all the tanks and their fill levels mapped on the screen. It reduces the number of truck rolls, so I'm able to gain efficiencies by better route planning. I can now offer a Pay As You Go service. My customers enjoy not having to pay for a full tank of gas. OWL[®] provides a more even cash flow for my customers and me, and allows me to maintain monthly contact with my customers. It's a great sales tool to gain new customers."

-Garry Lovelace, President, Lovelace Gas
